

Arif Khadikov

Process automation and optimization

arifhadikov@yandex.ru

I have spent four years automating and optimizing processes.

I analyze requirements and design enterprise IT solutions. I support work from interviews and process mapping through testing, user training, and implementation.

Work experience

Icover PRO

February 2025 - present | Business Analyst

E-commerce

Auditing end-to-end processes, gathering requirements, designing IT solutions, and defining development tasks within a business and systems analysis team.

- Designed the architecture and user flows for a WMS. Supported the launch of the receiving module at one warehouse.
- Audited, designed, and implemented an HR leave service. The company adopted the new process; the service is used by 300+ employees.
- Moved contract approvals to a digital workflow using RPA in Bitrix24. The process handles approximately 100 contracts per month.
- Documented approximately 50 processes and prepared approximately 30 technical specifications in one year.

Tools: Bitrix24, 1C Trade Management, BPMN / UML / DFD

High Technologies and Strategic Systems

January - August 2023 | Business Process Analyst

Research and industrial company

Formalizing internal processes and automating procurement contract approvals.

- Documented and connected 30+ business processes into a single map.
- Designed and implemented procurement contract approvals in 1C Document Management; prepared 10+ technical specifications.
- Trained 30 employees to use the new processes and automated workflows.

Tools: 1C Document Management, Camunda, Bizagi, BPMN / EPC

Skills and project experience

Arif Khadikov / Process automation

Core skills

Requirements discovery

Client and user interviews, process audits, AS IS / TO BE analysis, and requirements definition.

Solution design

Process models, user journeys, technical specifications, and integration design.

Implementation support

Development tasks, user acceptance testing, documentation, and training.

Independent projects

Banking document workflows

Conducted 20+ interviews, designed an integration with 1C Document Management, prepared instructions, trained users, and tested the system.

EAM for the nuclear and industrial sectors

Gathered user requirements, wrote eight technical specifications for enhancements, tested workflows, and aligned solutions with process owners.

HR processes and Bitrix24

Audited HR work and interviewed employees and managers; mapped HR processes, configured business and smart processes, and wrote technical specifications.

Service business automation

Mapped AS IS / TO BE processes, implemented YCLIENTS and HyperScript, and designed customer journey mockups in Figma.

Events and video production

Gathered client requirements, assembled teams, coordinated work, and managed schedules and budgets.

Tools

1C, Bitrix24, Jira, Confluence, Camunda, Bizagi, Business Studio, Visio, Draw.io, Figma

Basic SQL, general understanding of REST APIs, and introductory Python and C#.

Education

Plekhanov Russian University of Economics

Applied Informatics / Bachelor's degree, 2020
